Company Member Team Page

Task Description:

In task 1, develop a responsive web page for the Company Member Team Page. The design reference is provided in the attached file. Utilize HTML and CSS to bring this design to life, ensuring responsiveness across various devices. This project allows you to showcase your coding skills and creativity while adhering to the design reference.

Steps Taken:

The process of creating the company member team page started with defining the structure and content layout in HTML. This included outlining the header, team sections, and individual member containers. Each section and element was assigned appropriate IDs and classes for targeted styling. Next, the CSS stylesheet was developed to style the HTML elements according to the desired design. This involved setting fonts, colors, margins, and other visual properties to achieve a cohesive and visually appealing layout.

Challenges Faced:

One challenge faced during this project was ensuring consistent and effective responsive design across various devices while maintaining the aesthetic appeal and functionality of the web

Solution Implemented:

The solution involved using relative units like percentages and ensuring fluid layout

Learnings:

Learning to design responsively without media queries enhances adaptability, promotes cleaner code, and fosters deeper understanding of CSS fundamentals.

Project Update:

As per the guideline about the task 1, I completed the task, it is running well also. Team, from my side I tried my best, but as I am fresher, I know there must be some errors. I am learning gradually.

Thankyou.
